

kayhan mamak

Junior Developer

👤 Profile

Passionate and driven, I recently completed my full stack developer course at Monash University. I have a strong love for learning and a particular interest in the MERN (MongoDB, Express.js, React, Node.js) stack, with a focus on React and front-end development. Collaborating in team environments energizes me, allowing me to contribute my unique perspectives while learning from others. While I am currently sharpening my back-end development skills, my passion for React and front-end development remains unwavering. I have actively pursued courses on platforms like Udemy for the past two years to enhance my expertise. With my enthusiasm and commitment to personal growth, I am confident that I would be an exceptional candidate for your company.
